What is the current status of novice testing? Can two
generals still hold novice tests? Will a VEC exam session
accept elements passed in such a manner (as indicated on
a 610 form)?

Also, in what way are Technicians distinguished from
Technicians who have also passed the 5 wpm test?
In other words, is there something on the license or
on file with the FCC that differentiates between
technicians who are allowed HF and those who aren't?
I presume that a codeless tech can go into a VEC
session, take a 5 wpm code test and be granted
novitech HF privs...?

They should have done it differently... Novice should be
6 meters and up, Tech should have been Novice+HFCW.

It would have been less confusing. And while they're
at it, the words are pretty meaningless. They should
go back to class letters.
